

Lesson 4 - Assignment 03- Stashing

Solution

Execute the following steps:

- Create a new branch (**git branch**) and switch to it (**git checkout**)
- Edit the file and commit a change. Modify the file and stage it but don't commit
- Stash the changes (**git stash**) and switch the master to create another branch
- Apply the stash in the new branch and switch back to the earlier branch
- Apply the stash again and delete the stash entry
